Student Satisfaction Survey on Teaching Learning Process

1. How much of the syllabus was covered in the class?

 Copy

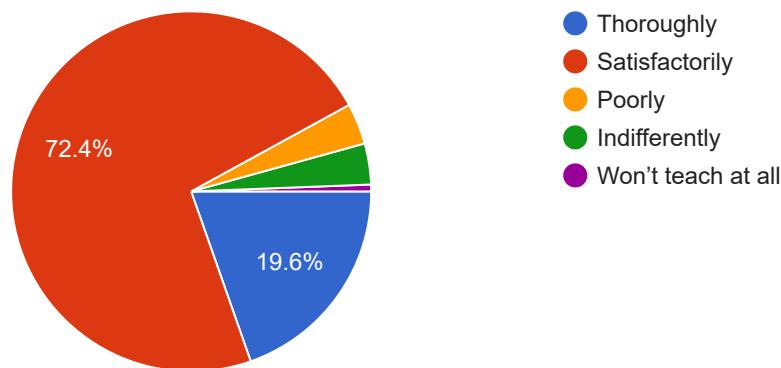

163 responses

2. How well did the teachers prepare for the classes?

 Copy

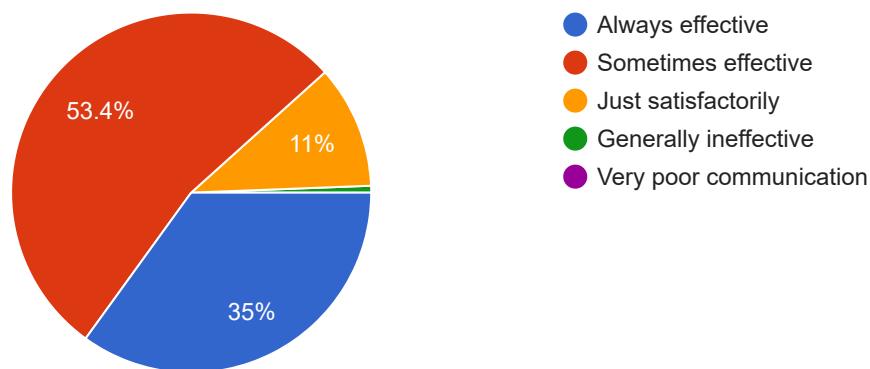

163 responses

3. How well were the teachers able to communicate?

 Copy

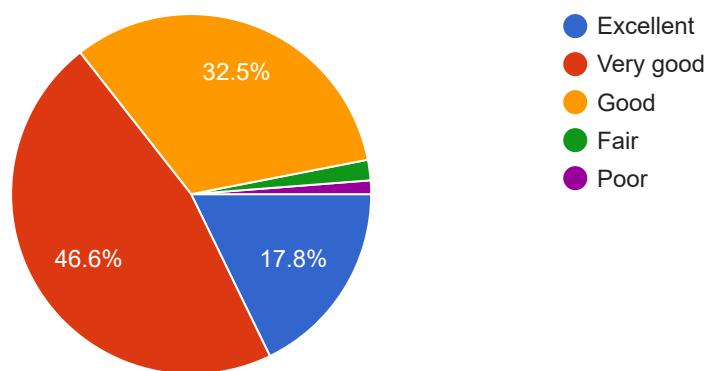

163 responses

4. The teacher's approach to teaching can best be described as

 Copy

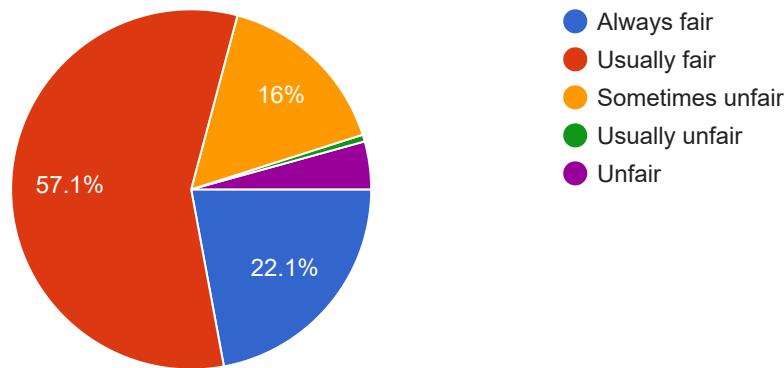

163 responses

5. Fairness of the internal evaluation process by the teachers

 Copy

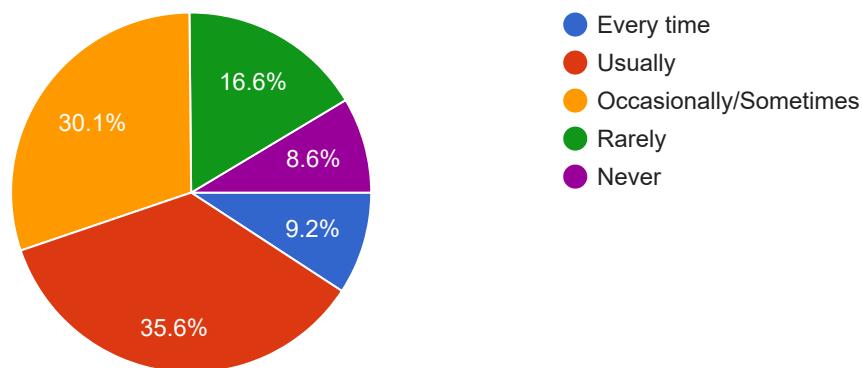

163 responses

6. Was your performance in assignments discussed with you?

 Copy

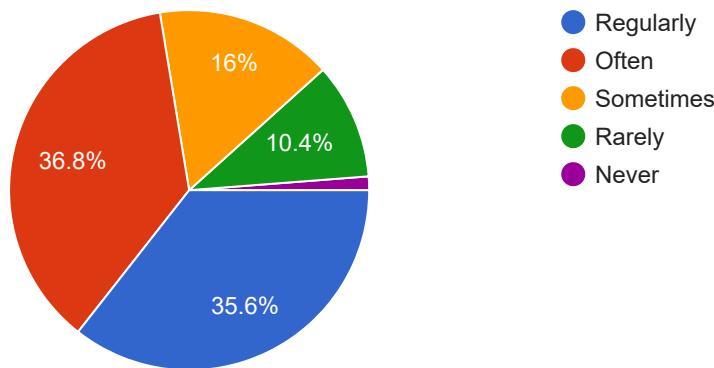

163 responses

7. The institute takes active interest in promoting internship, student exchange, field visit opportunities for students.

 Copy

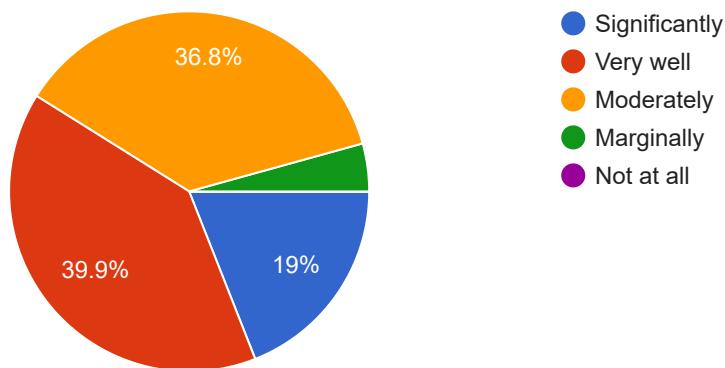

163 responses

8. The teaching and mentoring process in your institution facilitates you in cognitive, social and emotional growth.

 Copy

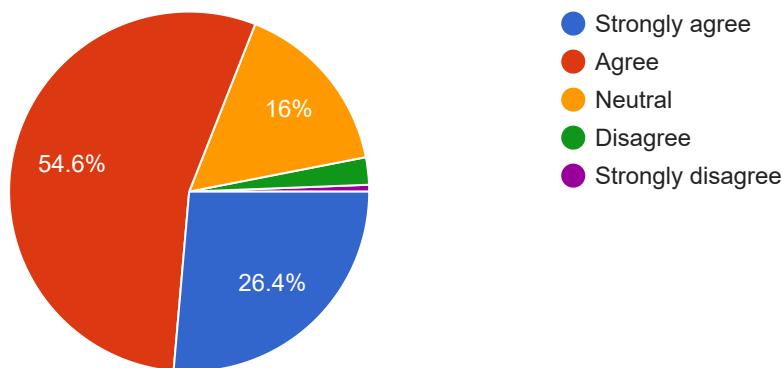

163 responses

9. The institution provides multiple opportunities to learn and grow.

 Copy

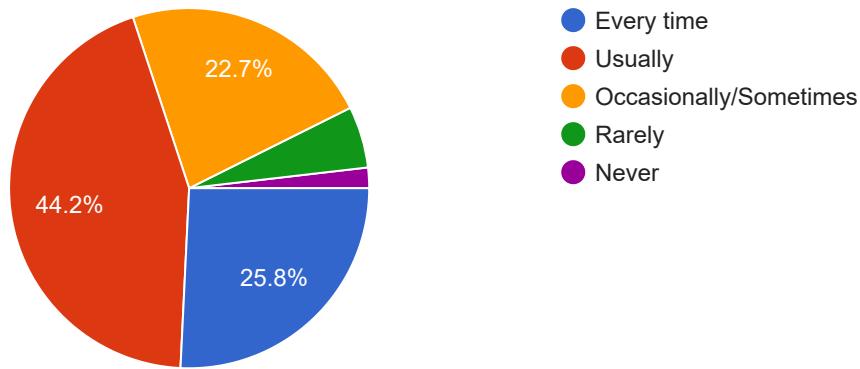

163 responses

10. Teachers inform you about your expected competencies, course outcomes and programme outcomes.

 Copy

21. Give three observation / suggestions to improve the overall teaching – learning experience in your institution.

163 responses

Nothing

Nil

Good

Nothing

No suggestions

No

No suggestion

Overall teaching learning process is good

The teachers must take care to avoid politically incorrect statements in class.

More discussions can be included in classes.

It shall be greatly appreciated if teachers avoid interfering with the personal lives of students unnecessarily

Hostel facility should be available, not mandatory for the students.

* Avoid conventional teaching methods

* Tutor ward must be improved

* Personal attention

Impartial internal assessment should be done

There is no needed of art and drama it's so boring

Bring some change in forth sem it's so boring and felt very bore to this course due to lag of forth sem

കേരളവീരി സമയം കൂട്ടണം.

Nil

Give more practical experience than theory

....

Ok

Inclusive environment, student autonomy

Unbiased approach, consider every student, take opinion from students

..

Continuous evaluation

Need proper sanitation facilities to the students who are physically not well. Deduce the importance of attendance

One mentor for a group of students-that pgm should be improved

NA

The academic schedule currently feels too packed, offering very little time for relaxation or independent study. Students have only one library hour per week, which is not enough for effective reading, research, or reflection. Increasing the number of library hours or introducing short breaks between academic sessions could greatly benefit students' mental well-being and academic performance.

Internet Access for Student

The campus is located in an area with poor mobile network coverage, and yet the institution has not taken any steps to provide internet access for students. This severely limits access to online learning resources, especially in the library, which ideally should be a space for academic growth. Installing Wi-Fi or ensuring reliable internet in key student areas like the library would be a meaningful step toward supporting students' academic needs.

Library time കൂടുക

skill enhancing program to be conducted periodically

Should provide proper instructions for practical ls

No more suggestions

Consider all students equally

Should be fair and impartial

Provide career related talks and fests

Professionaly competent

Provide opportunities to interact with persons who excellent in different field of education, prepare student for competative examination.student Parliment discussion every month that

help to know the current issues in college or class room

More preparation for lectures

More library hours than lectures

Teachers must send the notes according to the classes taken

Promote Active Learning

Encourage Interdisciplinary Learning

Good Teaching

Teaching- learning experience is very good

Kindly include job oriented mock interviews

Need relevant practical exposure more than theory classes and attendance

Record the attendance in every hour, conduct the classes of 4 th semester properly (during most of the time only 2 or 3 periods were held at a day)

no suggestion

1.Incorporate more interactive, student-centered activities like group discussions.

2.Integrating adaptive learning technologies.

3.Implement more frequent, formative assessments with timely feedback.

Should focus more on inclusive education and special strategies can be adapted.

Effective teaching

Encourage the strength of students

Find out their weakness and help them

Provide multiple opportunities beyond the syllabus

Make the students for life not only for exam

Provide technological education to students to meet the needs in such an ai world

Assignments can be given early as possible

Assesments should be done as much possible

Teaching learning process should occur outside of the classroom

Inclusivity

Effort and quality of assignments should be evaluated. Full mark or same Mark for everyone is fair

Nice

Time , the plan feels congested not satisfactorily able to perform in activities
written work should be reduced

Should be objective.

Individual monitoring

good teaching learning experience

NIL

Don't give the same marks to those who did the work/ task and those who didn't.

Better Counciling cell

Use student centric methods

Prepare for future and provide appropriate skills at early time

Include more experiential session

1.conduct more workshop on ict and research

2.please add more session to paper presentation and making opportunities to students.

3.Mentor should be evaluate the concerned students' strength and weakness and discuss with them for improvement.

Individual attention to be given especially during internship and tips on improvements too

Valuation and assessment should be transparent and judicious

To improve ICT facilities in every class

Student centric approach, proper leisure time, over strictness of teachers should be reduced, attendance relaxation.

Strengthen Student Support and Feedback Mechanism

1. Need unbiased evaluation

Give more time to students for self learning and improvement

Reduce the continuous nature of practicals and try to give more space in between .

.....

Encourage interactive methods to improve students engagement and participation

Need proper student teacher interactions.

Teachers should be more fair

peer interaction time

Try to maintain a good relationship with the students and encourage them considering their strengths and weakness, try to give importance to students participation, their ideas and needs

Must include some more soft skills

1. Wifi availability will greatly enhance it as internet is not largely accessible in the college for everyone, due to connectivity issues.

Nothing more to add.

Incorporate initiatives such as job fairs, placement cells, and career guidance programs to enhance employment opportunities for students.

...

Give proper advice in all curricular things

Make sure that internal marks are impartial

.

Student centered, activity oriented

Make classroom more interactive

Making the academic calendar flexible.

Gave more cocurricular activity

good

The Rubrics for the internal assessment should be given to students and provide marks accordingly, Provide feedback on assignments and works, Inculcate soft skills, life skills and employability skills, Modify unproductive writing works to better skills

1. Differentiated instruction

2. Research based learning

Research and publication cell for students.

The reading capability of students are very poor. It would be good if there are more reading opportunities given to students or them being motivated.

Conduct exams and internals in proper time,

PowerPoint presentations are helpful, but reading directly from slides in every class becomes repetitive and less engaging. Most of us can go through the slides on our own. Instead, teachers can focus on explaining key points using the blackboard, real-life examples, or stories. This will make the class more interactive and easier to understand. Yoga and art are valuable in themselves and should be included regularly rather than just once a week for creating stress. Regular weekly yoga sessions can improve our physical and mental health. Art, craft, and creative work should be encouraged as part of our co-curricular life—not as a one-week workshop for the purpose but as ongoing activities. More time should be given to micro-teaching sessions, where we can try out teaching techniques in front of peers and get feedback. We also benefit from visiting real classrooms and observing experienced teachers in action. This helps us understand how to manage real teaching situations. Instead of lectures alone, classes can include methods like think-pair-share, role play, teaching games, or open discussions. These activities help us stay engaged and learn from each other. Inviting guest teachers to share their classroom experiences can also give us useful insights and inspiration.

Take suggestions from students, use ICT, include courses to enhance employability skills,

Adapt curriculum with 21st century needs, use ICT maximum, share learning materials, resources...etc.

Lecturing can be more attractive rather than the traditional way!

Class of 100 students is not satisfactory to take seminar. If the class divided into small number each student will get more chances to participate and help to improve attention.

Consider all students situations and problems

1. Teachers can use English as the medium of communication.

2. Students should be given a clear idea of how many teachers deal the same paper and portions taken by them, especially for first sem students.

3. Criteria for providing marks for practicals like EPC can be made more visible.

Ni suggestions

Good

Overall teaching learning is really good and i strongly agree.

Tutorward must be improved

Improve interactive learning method and use more interest example
